## AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning on page 9, at line 25, as follows:

Additionally, the present invention provides compositions comprising a heterologous antigen linked to the amino acid sequence set forth in SEQ ID NO:58, the amino acid sequence comprising a loop region and further comprising from 1 to 100 amino acids at the carboxy end of residue I<sup>149</sup>, and residue V<sup>149</sup>, wherein the 1 to 100 amino acids does not comprise C<sup>150</sup> or the sequence set forth in SEQ ID NO:42 (excluding C<sup>150</sup>, and the wild type C-terminus). In some preferred embodiments, the 1 to 100 amino acids is chosen from R<sup>150</sup>, K<sup>150</sup>, A<sup>150</sup>, R<sup>150</sup>R<sup>151</sup>C<sup>152</sup>, and SEQ ID NOS:3-6, 43-56. In other preferred embodiments, the 1 to 100 amino acids is chosen from SEQ ID NOS:2, 7-20. In still further preferred embodiments, the 1 to 100 amino acids is chosen from SEQ ID NOS:22-36. Additionally, in particularly preferred embodiments, the heterologous antigen linked to the amino acid sequence set forth in SEQ ID NO:58, comprises a particle having a diameter of 25 to 35 nm.

Please replace the paragraph beginning on page 11, at line 19, as follows:

Also provided by the present invention are compositions comprising the amino acid sequence set forth in SEQ ID NO:58, the amino acid sequence comprising a loop region and further comprising from 1 to 100 amino acids at the carboxy end of residue I<sup>149</sup>: residue V<sup>149</sup>. In some preferred embodiments, the 1 to 100 amino acids is chosen from R<sup>150</sup>, K<sup>150</sup>, A<sup>150</sup>, R<sup>150</sup>R<sup>151</sup>C<sup>152</sup>, and SEQ ID NOS:3-6, 43-56 (excluding C<sup>150</sup>, and the wild type C-terminus set forth in SEQ ID NO:42). In other preferred embodiments, the 1 to 100 amino acids is chosen from SEQ ID NOS:2, 7-20. In still further preferred embodiments, the 1 to 100 amino acids is chosen from SEQ ID NOS:22-36. Additionally, in particularly preferred embodiments, the heterologous antigen linked to the amino acid sequence set forth in SEQ ID NO:58, comprises a particle having a diameter of 25 to 35 nm.
